

What is a charrette?

A charrette is a collaborative planning process that harnesses the talents and energies of everyone from city planners to business owners working together to arrive at the best possible solution to the complexities and design issues of a new development.

What is the new development?

Coming soon...a new kind of development designed to create a sense of community, a sense of place and architectural character. A vast array of building styles, town squares having residential, commercial and civic uses. Public amenities including parks that are within walking distance. Can't imagine? That's ok, let us show you!

How we could use your input?

We would like your ideas as we design this new development. Have you ever wished Yukon had...? Or wondered why your community doesn't have...? Please make plans to attend this forum to learn and exchange ideas for designing this exciting new development.

What, When, Where?
